We have lucked out....I can have this one on Friday when the radon mitigation is being done.

Can you provide me with as much detail as possible on where you want this plug....please see exchange below.

Brian Smith

Ashley,

I know that I am not giving much info here....I am sorry about that.

I would offer to meet the electrician at the house on Friday 9/13, but I am entertaining a customer coming from Ohio that day in the gorge.

I will get some specific information from my low voltage company (the guys asking for this) and pass it along).

If they can't get sufficient information for your electrician to get this done, then I will try to get into the house Wednesday after work and tape something to the location where we want the plug and a picture of the breaker.

I hope to have answers for you by tomorrow.

Sincerely,

From: Ashley Jacobson <ashley@eworksnw.com>

Okay Brian,

Yes this is something they can install on Friday.

Do you happen to have a picture of the electrical panel so we know what type of panel and what type of breaker we will need to supply for a dedicated circuit.

Thank you!
