**Solution Summary:**

Provide network infrastructure and surveillance cameras to enhance the current solution. Cameras being replaced will be mounted in nearly the same location as the existing cameras; although, minor adjustments may be made in order to obtain the best possible view.

The Common Area inside the apartment building will utilize two cameras per floor to provide coverage of every tenant doorway. Additionally, there will be cameras positioned at each entrance and the laundry facility. The parking lot current utilized three fixed cameras to cover three different areas. These cameras will be replaced with a 360° camera at the same location. The new camera will provide 270° coverage on that corner of the building. The existing camera covering the back grass will be replaced with a similar style.

**Exclusions/Exceptions:**

1. Proposal does not include hi-lift.
2. Proposal does not include a viewing PC or monitor.
3. Any applicable shipping/handling will be added to the final invoice.
