Chris, do we want to pull two (2) cables, one on each end of the canopy? That way if you need to add a camera on the other end it would be ready.

Hello Jerry,

We will need to have the camera line installed under the covered area at the Primary School as soon as it can be scheduled.

We apparently had some vandalism this past weekend in the very spot we need coverage, which has illustrated the need to move this up the priority list.

Can you let me know, at your earliest convenience, when this can be done?

Thanks for your help.
