Good day,

We would like to pick back up with the IP cameras mentioned below. Eric, there is some other work with a lift that is being done at our facility and we wanted to touch base and see if we could coordinate the work on the cameras and potentially use it if possible. Does that work for you?

Do not want to replace any Analog camaras

Only the IP camaras if need it

Thanks Hector,

I think we were waiting on a decision to order the lift. As I mentioned, it will cost nearly \$1,500. With three cameras having issues, it might be time to order it, but we need if your authorization.

Thanks,

Eric

I spoke with Hector and Nestor. It is the one I pointed out, and our maintenance guy was able to use our scissor lift to look at it by using some wood to secure the wheel or something.

Hi Nat,

Let me check with our install team and see what their availability is on this. I don't suspect this will be much, but I need to talk with them before I commit to a day/time.

Thanks,

Eric

Subject: NVR Front Park 1 Camera Mounting Issue

Good day,

The Front Park 1 camera on the NVR has been moving a bit recently and Nestor determined that the mounting is a bit loose. Would you please send someone out to fix it?

Respectfully,

Nathaniel Q. Onuf
