Hi Allen:

Rachel (Key Electrical), Andrew and I met with Ramsi this morning.

Printer Power

Ramsi and his staff explained what needed to be done to provide power to three printers. Key Electrical began work this morning. Rachel anticipates this work will be completed tomorrow (Wednesday). Ramsi was good with this timing.

Records Department

We looked at the area with Ramsi. While we (Key / Empower) completed the scope of work, there was a miscommunication regarding what Rachel and I heard and what Ramsi wants. Tomorrow (Wednesday), Key will convert two existing duplex outlets to quads, and Empower will install one additional data drop to an additional location. I confirmed with Ramsi that this additional work would make him happy and he said it would.

I'll let you know tomorrow when we have completed these tasks.

Erik
