Could you please do this one and send me a quote afterward? This is kind of hot:

Room 102. Need old AV cables and metal casing taken out of walls and shelves. Room 102 is being converted from an office to a classroom. There are 4 AV/data ports in the walls with at least 10 feet of black cords that need to be removed. Also, on the built-in wall shelving, there are sections of long metal casings that need to be removed.

I do not have any pictures, but if the metal castings she's talking about are wire mold, see if we could just cap it rather than remove it. Send me a picture of it if you have any questions.
