Hello Erik

Once again thank you for the phone call. I have high hopes for this relationship. Sounds like there's some synergy between our companies.

Attached are the plans for the Gresham Bank of America. The address for the site is on the prints for permitting purposes.

Currently all materials are on site. It is ready to go so as soon as permit is in hand we can put feet on the ground.

Really looking for to working with you and your team now and in the future. FYI as I mentioned the two RENO's coming up immediately after this new construction site are located in Tigard and Beaverton.
