**Subject:** Re: Rack Move

Hi Carl:

Will it work if we arrive Monday morning at 8:00am to meet up with you? Let me know. Thanks!

Erik

Carl and Bob

Just wanted to everyone know that Erik Hopkins with Empower Digital will be onsite Monday the 17<sup>th</sup> to start. I informed Erik that he needed to get with you Carl on getting things going. I will make myself available to via cell phone if you need me or want to talk through the project.

Carl, please take Erik and his team to IDF #1 so he can get an idea on how to move IDF #2 into the air. I'm sure he'll have ideas of his own that will work just fine, the goal is to have IDF #2 in the air and out of the way one way or another. I've also informed Erik that you are there to help with any questions or concerns during this project.

Empower will be ordering lifts during this project as I'm not sure what style of lift will be needed to do the work efficiently.

The basic jiff of the project is to move existing and add APs as needed, add cables as needed, and move IDF #2 into the ceiling. So, everyone is on the same page with IDF #2 we will be connecting the existing switches in the 6U cabinets via copper connections, from two of the closest IDF's using Game Changer cable.

I hope this clarifies when we are going to start and how things will be connected.

Thank you
